

Unocode Pro is the top electronic key cutting machine for decoding and cutting either by code or from original flat cylinder, vehicle keys and cruciform keys.

<sup>\*</sup> Keys cut with specific optional accessories.

### The professional key machine

- Designed for experienced locksmiths and professional key cutters, Unocode Pro wraps together outstanding performance, ease of use and highquality components.
- The machine can work both in standalone mode or with a PC connection that enables you to access the largest key database available on the market via user-friendly software.

#### **Main features**

- Faster cutting cycle.
- Long-lasting cutter.
- Optimized four-sided clamps.
- Resistant hardware and finishing.
- User-friendly software.
- Maintenance menu.
- Cut keys counter.

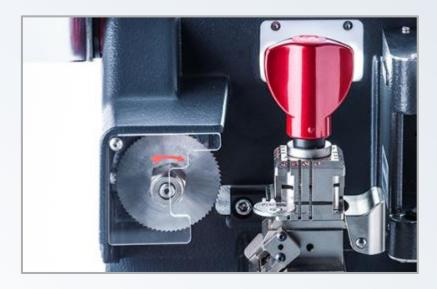

#### **Faster cutting cycle**

- New pulley ratios deliver more torque to the cutter.
- The faster carriage movements reduce cycle time by:
  - 10% for decoding cylinder keys
  - 25-30% for cutting cylinder keys compared with the Unocode 399 Evo\*.

\* Tests have been performed using Silca branded keys with 5 pins.

#### Long-lasting cutter and hardware

- The AICrN (aluminum chromium nitride) **coating** keeps the cutter temperature lower.
- The optimized cutter speed ensures a longer life.
- The cutter features a **new sharpening**.
- All exposed screws are made of stainless steel for better resistance and a longer life.

#### Four-sided clamps

- The four-sided clamps feature a quickrelease system for easier rotation.
- They are nickel plated, are rustproof and less prone to wear.
- The clamp locking handle is ergonomic and features a torque control system.

#### **Optimized work station**

- The reinforced structure of the machine reduces vibrations, making Unocode Pro stable and quiet.
- On top of the machine there is a utensil tray with non-slip mat to help you keep your work bench neat and tidy and keep all your tools and accessories within easy reach.
- The new cutter sharpening means swarf is left only in a small area and collected in the incorporated pull-out tray on the side of the machine.

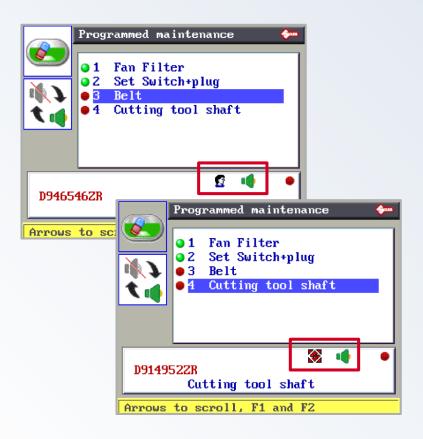

#### **User-friendly software**

- The software controlling the machine is designed specifically for specialists in the key cutting business and allows you to perform searches by cutting card.
- A number of useful functions have been added to improve maintenance so optimizing the use of the machine over time.
- The machine is provided with USB and RS232 port for external connectivity.
- The machine is equipped with a 5.7" coloured display.

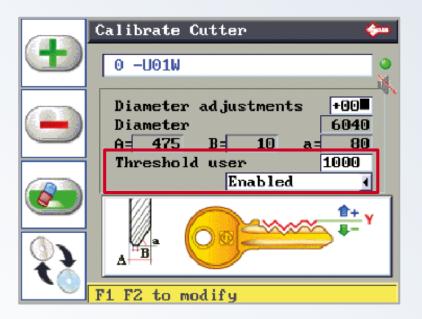

### Software management of maintenance (Activated by the installer)

- The new maintenance menu, programmed by the installer, advises on maintenance necessary for parts subject to mechanical wear.
- Depending on the setting, the software advises whether the intervention can be performed by the user (e.g. changing the belt) or by the installer (e.g. changing the cutter shaft).
- Activated parameters are marked by a green light, whilst components that need maintenance or replacement are signalled by a red light.

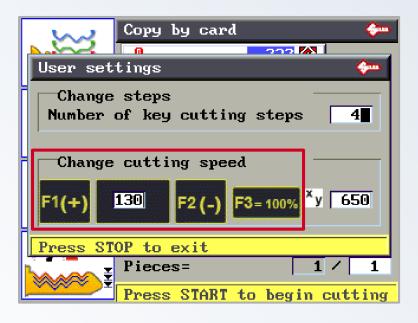

#### Cut keys counter (Activated by the user)

- The machine keeps a running total of keys cut with each individual cutter, saving the need to manually make a note at each operation.
- The software advises the operator on cutter use and suggests when the cutter needs replacement.
- The notice is activated when a pre-set level of keys cut is reached. The level is adjusted by the users according to their use of the machine.

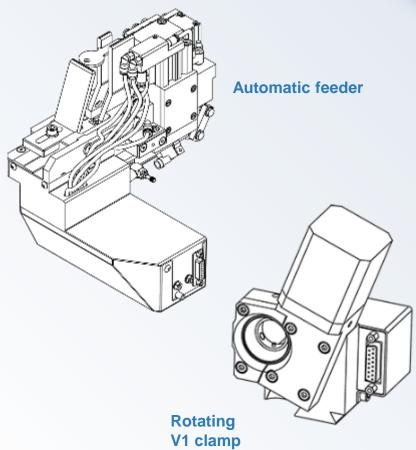

#### Adjustable cutting speed

- Once you have selected the cutting card to use, you can modify the cutting speed by 30%.
- In this way, you can speed up work queues or slow down to limit cutter wear.

#### **Optional tools and accessories**

- The **automatic feeder** saves time and effort in cutting single sided flat keys.
- The optional rotating V1 clamp enables you to operate also on the third axis for angled cuts. Together with other dedicated accessories, it allows you to duplicate Abloy®, Abus®, Ava®-Chubb®, Chubb®, Ford® and Luma® type keys.

Further optional accessories available. For more details, visit our website.

Technical Data	
Power supply	230V - 50Hz, 100V -50/60Hz
Motor	single phase, one speed
Standard cutter	U01W in AlCrN coated hard metal
Cutter speed	50Hz - 1700 rpm (+/- 10%)
Movements	on 2 axes with ball screws activated by step motors, on rectified roller guides. Possibility to add a 3rd axis to activate the optional tilting and rotating clamps.
Carriages runs	axis X: 57 mm, axis Y: 32 mm
Clamp	V100 universal four-sided, nickel plated
Dimensions	width: 450 mm, depth: 600 mm height: 440 mm (with raised shield: 680 mm)
Weight	38 Kg
